

PROJECT DEMO PLANNING SCHEDULE

Developer: [Left Blank] | OptiCrop Project Documentation

Repository: <https://github.com/sribalakatta/Project-OptiCrop-Smart-Agricultural-Production-Optimization-Engine->

1. Demonstration Timeline and Hardware Settings

The presentation is organized to demonstrate the system's end-to-end cycle in 15 minutes:

- System Boot and Init (2 minutes): Run local flask server on port 5000 and verify model pickle health status.
- Scenario Walkthroughs (8 minutes): Run predictions for optimal soil configurations and deficient configurations.
- Telemetry Dashboard Review (3 minutes): Discuss accuracy charts and feature Gini rankings.
- Q&A Session (2 minutes): Walk through potential scaling options like IoT and Leaf disease CNN.
